	12:05	Nick Mastronardi	8839 N. 83rd Street	588-5511	Skydive	S	I would like to file a complaint against Mile-Hi Skydiving. They are a complete nuisance to Longmont, Boulder County, Niwot, and Gunbarrel residents. My recommendation is that you, the airport advisory board, and Longmont City Council properly focus on this problem. As more people become aware of the source of this non stop noise, there is no doubt the complaints will increase, and this will no longer be something that the various parties mentioned above can simply dismiss.	Called and e-mailed him back the info he requested

	9:55	Steve Jennings	West of Airport	e-mail	Skydive	S	Today, Sunday, August 21st, I have had both the twin otter and twin Beech repeatedly use the same pattern of climb and decent. I am fully aware of airspace restrictions, winds and aircraft landing patterns. In my opinion this is simply abuse of one area of Longmont, with no regard by the pilots to vary each lift route, totally possible within all regulations and with respect to other aircraft. (remember, I have been in aviation for 25 years).	E-mailed him back

8/22/2011	1:30	Lynda Smith	Airport and Nelson	e-mail	Skydive	S	I do wish to submit an official complaint for the weekend of August 5-7, and August 12-14 regarding Mile-High Skydiving and secondarily, some general flights. I am vehemently opposed to jumps taking off before 0900 on weekend mornings. MHS had jump flights outbound as early as 0715. Just as there are residential noise ordinances in place for homeowners, surely, the FAA and the City of Longmont could/should impose time and decibel restrictions on MHS. Additionally, why could they not also impose restrictions on the number of jumps per hour? Even inside with windows shut, the drone of the jump planes continue at an extremely agitating level that can be heard in the background of every phone conversation, television show or movie, music, etc. Along with that, on many mornings, there are also several private planes in the air at any given time, particularly weekend mornings. Not only does this raise the question of safety, but again, it's early morning weekends, and the noise is deafening. It's not always possible to obtain the plane make or number, but some of these pilots buzz the neighborhood at low altitude/fast speeds and the buildings literally shake. It is impossible to have a conversation on your deck or patio over coffee, and enjoy a quiet morning breakfast.	E-mailed her back
